PROFILE

Computer Science student who likes building projects and understanding how they work. I've worked on projects across full-stack development, AI/ML and system engineering.

PROJECTS

Aquila - Search & Information Retrieval System

- Built a search engine from scratch using Python.
- Implemented foundational components including tokenization, inverted-index, retrieval, and ranking.
- Engineered BM25 ranking to score and rank documents on query-based relevance

Lynx - Personal Voice Assistant

- Developed a voice assistant capable of understanding spoken intent.
- Integrated LLM function calling, STT, and TTS functionality.
- Designed a modular architecture : voice processing, LLM interaction, function calling and response generation.

Collage of Colors - Landing Page for Creative Agency

- Built a modern, responsive digital studio web application using React, TypeScript, and Vite.
- Developed core features including dynamic service routing, an interactive work gallery showcase, UI components with Tailwind CSS and Framer Motion for smooth page transitions / animations

EDUCATION

B.Tech in Computer Science and Engineering

Aug 2024 - Aug 2028

ITM Skills University, Kharghar - Navi Mumbai

SKILLS

- **Languages** : Python, C++, JavaScript, TypeScript, Java
- **Frontend** : React, Next.JS, Tailwind CSS, GSAP, Framer Motion
- **Backend** : Node.JS, Express.JS, REST APIs, GraphQL
- **AI/ML** : Machine Learning, Deep Learning, NLP, PyTorch, Scikit-Learn
- **Tools** : Git, GitHub, Docker, Figma, n8n, Google Colab, Hugging Face, Kaggle

BEYOND CODE

- **Languages** : English, Gujarati, Hindi, Marathi, Sanskrit
- **Interests** : Music (Piano), Psychology, Sketching, Pixel Art, Chess
- **Philosophy** : Solarpunk
